CONTENTS

Introduction 1
by A. J. H. Goodard and M. M. R. Williams

New Developments in Finite Element Reactor Calculations 3
by A. Kavenoky and J. J. Lautard

A Finite Element Method for Diffusion Theory Embracing Nodal and Difference Methods 7
by R. T. Ackroyd

The Relation Between Finite Element Methods and Nodal Methods in Transport Theory 21
by W. F. Walters

Phase-Space Finite Elements Encoded in ZEPHYR for *X–Y* and *R–Z* Transport Calculations 27
by M. Mordant

Discontinuous Finite Elements for Neutron Transport Analysis 39
by R. T. Ackroyd and W. E. Wilson

Generalized Least Squares as a Generator of Variational Principles and Weighted Residual Methods for FEM Transport Methods 45
by R. T. Ackroyd

Finite Element, Nodal and Response Matrix Methods: A Variational Synthesis for Neutron Transport 63
by E. E. Lewis and I. Dilber

Recent Developments of the Transport Theory Code MARC/PN 75
by J. K. Fletcher

Treatment of Voids in Finite Element Transport Methods 85
by R. T. Ackroyd, J. G. Issa and N. S. Riyait

Multigroup Anisotropic Scattering in the Finite Element Method 91
by J. Wood

Three-dimensional Nodal Diffusion and Transport Methods for the Analysis of Fast-Reactor Critical Experiments 101
by R. D. Lawrence

A Hexagonal Geometry Nodal Expansion Method for Fast Reactor Calculations 113
by J. M. Putney

SIXTUS-2: A Two-Dimensional Multigroup Diffusion Code in Hexagonal Geometry 123
by J. J. Arkuszewski

Performance of Three-Dimensional Nodal Discrete Ordinates Methods 137
by A. Badruzzaman

A Nodal Transport Theory Method in Hexagonal Geometry 145
by R. L. Mauger

The Nodal Transport Method for General Triangular Meshes in (X,Y)-Geometry 153
by R. R. Paternoster and W. F. Walters

New Spatial and Angular Flux Approximations and Accelerations for the Finite Element Transport Code TRISM 161
by J. Stepanek, J. W. Davidson, D. Dudziak and C. E. Higgs

Extensions to the Finite-Element Code FENDER to Accommodate Three-Dimensional Problems 173
by C. Budd and E. Shuttleworth

The Treatment of Voided Regions in the Finite-Element Diffusion Code FENDER 185
by S. J. Chucas

An Integral Transport Method for Treating CANDU and GCR Clusters 197
by G. Marleau and A. Herbert

A Computer Program for Solving the Three-Dimensional Multigroup Diffusion Equation by Finite Element Method with 20-Node Isoparametric Element (FEM3DJAR) 207
By Y. Naito, R. Kawamura, Y. Tokuno and S. Tsuruta

Comparison of Numerical Solutions to Predict Neutron Steaming in Shield Design for Reprocessing Plants 215
by A. K. Ziver, J. Issa, N. Riyait and M. H. Watmough

An Arbitrary Geometry Finite Element Method for Multigroup Neutron Transport with Anisotropic Scattering 227
by C. R. E. De Oliveira

The Finite Element Response Matrix Method for the Solution of the Neutron Transport Equation 237
by J. A. Rathkopf and W. R. Martin

Multigroup Application of the Anisotropic FEM Code FELTRAN to One, Two, Three-Dimensions and *R–Z* Problems 251
by J. G. Issa, N. S. Riyait, A. J. H. Goddard and G. E. Stott

Analytical and Experimental Performance of Sphere-Pac Nuclear Fuel 265
by K. L. Peddicord, R. W. Stratton and J. K. Thomas

A New Treatment of Low Probability Events with Particular Application to Nuclear Power Plant Incidents 301
by O. H. Critchley
